

In The United States Patent And Trademark Office

Applicant:	Juha Maijala et al.	Date:	July 9, 2007
Date Filed:	January 25, 2005	Docket No.:	METSO-20
App. No.:	10/507,436	Art Unit:	1773
For:	A Method for Coating a Surface of a Continuous Web with a Coating Powder	Examiner:	K. Kruer

Filed by Electronic Filing System

Election

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

The Commissioner is hereby authorized to charge any additional fees that may be required with respect to this communication, or credit any overpayment, to Deposit Account No. 50-2663.

In response to the Office action dated June 27, 2007, applicant elects the claims of Group I, claims 20-43 with traverse. Applicant traverses the examiner's requirement for restriction because the examiner bases the restriction on a Japanese reference 55016938A stating "*teaches a paper coated with a coating comprising an inorganic filler and organic binder in the claimed amounts*". However, the examiner has not explained how *JP 55016938A* discloses and enables a paper substrate and a coating comprising 70-99wt% inorganic material and 1-30wt% polymeric binder material. A suggestion to try a very large range of possibilities does not make every such possibility obvious, and so cannot be said to teach every possibility within a broad range.

Applicant submits that the claims, are in condition for allowance. Favorable action thereon is respectfully solicited.

Respectfully submitted,

Patrick J.G. Stiennon, Reg. No. 34934
Attorney for Applicant
